Summary

AI/ML Engineer with 2+ years of hands-on experience building Computer Vision, NLP, and LLM-based systems — including a production analytics tool used by 1,000+ students. Recently interned at Zoho Corporation on model explainability (SHAP, Captum, integrated gradients). Seeking AI/ML engineering roles to ship production systems end-to-end.

Education

Kumaraguru College of Technology Coimbatore, India
Bachelor of Engineering — CGPA: 8.2 / 10 May 2026

Experience

Zoho Corporation Oct 2025 – Jan 2026

- Project Trainee*
- Implemented 3 model attribution methods (gradient-based, integrated gradients, SHAP) for classification and regression models, enabling engineers to audit model decisions without writing custom code per model.
 - Automated SHAP and Captum explanation workflows, reducing manual feature analysis time by ~90% and eliminating ad-hoc scripting across the team.
 - Built a FastAPI backend with a lightweight HTML interface to serve and visualize feature-level attributions interactively.

iQube Innovation Center, KCT Sep 2023 – 2026

- Student AI Engineer*
- Built 3 end-to-end AI systems spanning Computer Vision, LLM-based document extraction, and academic analytics; the SGPA/CGPA Calculator is in production, actively used by 1,000+ students across KCT.
 - Owned full project lifecycle: data collection and labeling, model training, backend development, and deployment.
 - Founded Team Qernels, a student ML team within iQube; mentor junior members on ML fundamentals and onboard them into active projects.

Projects

- WelVision — Industrial Roller Inspection System** | *Python, OpenCV, YOLO, Snap7, MySQL*
- Built an end-to-end Computer Vision pipeline for real-time defect detection on a manufacturing line, integrated with PLCs via Snap7.
 - Improved accuracy from 70% to 90% with YOLO-based detection; cut latency by 40% and annotation time by 80% via model-assisted labeling on 10,000+ images.
- SGPA & CGPA Calculator** | *Python, PyMuPDF, Streamlit, Together.ai (Llama)*
- Deployed a web app extracting academic data from result PDFs; adopted by 1,000+ students, cutting processing time by 95% and computation errors by 99% vs. manual calculation.
- KCT Admissions Automation** | *Python, Flask, Surya OCR, Google GenAI (Gemini Vision), PyPDF*
- Backend API auto-filling student onboarding data from admission PDFs; iterated to Gemini Vision OCR, achieving 80% structured extraction accuracy across 100+ unstructured documents.
- AI Resume Builder (prototype)** | *Python, Flask, LangChain, LangGraph, Google GenAI, PDFLaTeX*
- Prototype generating ATS-compliant resumes via a LangGraph agentic workflow, orchestrating LLM calls for content generation, formatting, and LaTeX compilation end-to-end.

Technical Skills

Languages: Python, C++, Java	Machine Learning: Scikit-learn, NumPy, Pandas
Tools: Git, GitHub, Docker	Deep Learning: PyTorch, TensorFlow
CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, OOP	Computer Vision: OpenCV, Ultralytics, Roboflow
Backend: FastAPI, Flask, Streamlit	LLMs & GenAI: LangChain, LangGraph, Agno, MCP, HuggingFace Transformers, Prompt Engineering, RAG
	Databases: MySQL, ChromaDB, FAISS

Achievements

Runner-Up, HackToFuture 4.0 (National Level Hackathon) — among 705 competing teams (2026)
HTB Apocalypse 2025 (Team Nova) — 53rd / 4038 globally, top 1.3%
WolvCTF 2025 (Team Nova) — 50th / 455 globally, top 11%
JC Bose Award — Showcasing Excellence in Innovation in RiG, KCT (2025–26)
SN Bose Award — Emerging Excellence in Innovation, KCT (2024–25)
Certificate of Recognition, Republic Day Celebrations 2026, KCT — academic & co-curricular excellence
Lead Organizer (Team Qernels), ML Fest @ Yugam 2026 — 75 registrations, Rs. 10K prize pool
Mahatma Gandhi Merit Scholarship — Academic Excellence (2023–24)

Certifications

Machine Learning Foundations (AWS Academy) · Advanced Learning Algorithms (DeepLearning.AI) · Unsupervised Learning, Recommenders & RL (DeepLearning.AI) · MySQL Advanced (HackerRank)
